LAB FINAL ANSWER

Answer – 2

Code :-

"""

Created on Sat Dec 12 11:10:17 2020

@author: RUHUL AMIN PARVEZ

"""

```
test_str = str(input("Enter line of string: "))
```

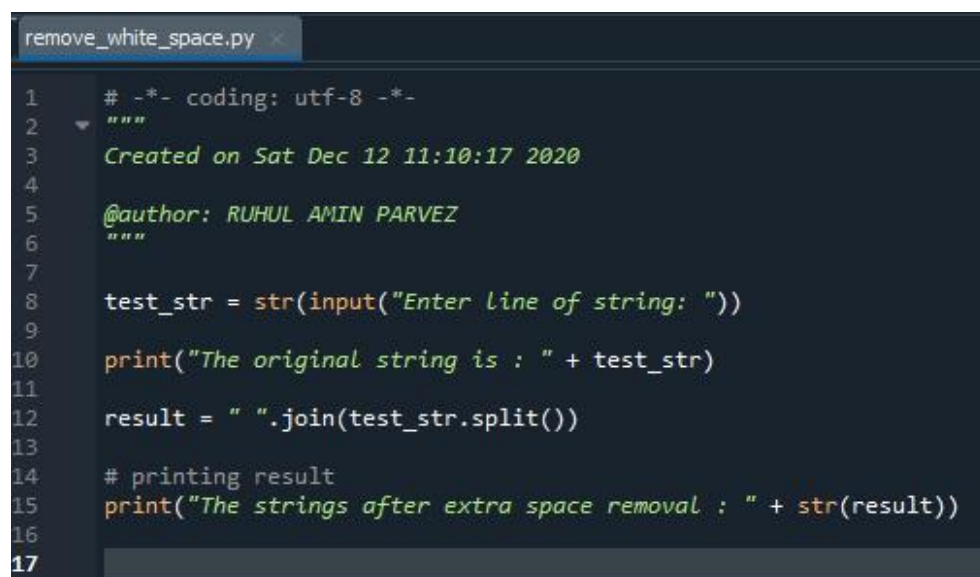

```
print("The original string is : " + test_str)
```

```
result = " ".join(test_str.split())
```

```
# printing result
```

```
print("The strings after extra space removal : " + str(result))
```

CODE SCREENSHOT

```
remove_white_space.py x
1  # -*- coding: utf-8 -*-
2  """
3  Created on Sat Dec 12 11:10:17 2020
4
5  @author: RUHUL AMIN PARVEZ
6  """
7
8  test_str = str(input("Enter line of string: "))
9
10 print("The original string is : " + test_str)
11
12 result = " ".join(test_str.split())
13
14 # printing result
15 print("The strings after extra space removal : " + str(result))
16
17
```

RUN TEST SCREENSHOT

```
In [8]: runfile('C:/Users/RUHUL AMIN PARVEZ/Downloads/remove_white_space.py',  
wdir='C:/Users/RUHUL AMIN PARVEZ/Downloads')
```

```
Enter line of string: programming is    an  art.  
The original string is : programming is    an  art.  
The strings after extra space removal : programming is an art.
```

```
